Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The new title has been entered.
2. The indicated allowability of claims 5-8 is withdrawn in view of the newly discovered reference(s) to Stupp et al (DE 4039276 A1) and Priddle et al (WO 9749539 A1). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Stupp et al (DE 4039276 A1).

Stupp et al (see the entire document, in particular, note the attached English-language abstract) teach a process for shrinkwrapping as set forth in the instant claims, including affixing (to the heat shrinkable material) means for releasing (in this case, a zip fastener) the heat shrinkable material, so that the heat shrinkable material may be opened and reused. Stupp et al do not specifically teach shrinking the material at a temperature below the melting point of the means for releasing; however, such would be inherent in Stupp et al principally in order to not damage (e.g., by melting) the material of the zip fastener.

5. Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Priddle et al (WO 9749539 A1).

Priddle et al (see the entire document, in particular, note pages 1-4) teach a process for shrinkwrapping as set forth in the instant claims, including affixing (to the heat shrinkable material) means for releasing (in this case, VELCRO® fasteners) the heat shrinkable material, so that the heat shrinkable material may be opened and reused. Priddle et al do not specifically teach shrinking the material at a temperature below the melting point of the means for releasing; however, such would be inherent in Priddle et al principally in order to not damage (e.g., by melting) the material of the VELCRO® fasteners.

Allowable Subject Matter

6. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
